

Mostardi Platt Environmental Permitting and Consulting

No surprises — that's what a good permitting plan ensures. Mostardi Platt Environmental understands how to eliminate the unexpected. With extensive experience in virtually every industry, we understand your unique requirements. We're full-service consultants ready to help you create a comprehensive permitting strategy.

Your full-service partner

We begin by helping you strategize. Our consulting professionals evaluate your facility needs and your business goals to determine the best strategy and plan. When appropriate, we also provide assistance with testing and modeling.

For new facilities, we identify all permits necessary for construction and create a comprehensive plan.

It includes:

- All environmental permits necessary to construct and operate
- Timeline of tasks (to ensure compliance during construction and startup)
- Studies of environmental impact (and of historical and cultural impact if necessary)
- Noise impact studies and modeling

A proven process

The Mostardi Platt Environmental (MPE) process follows these steps:

- Assess facility to determine permitting needs
- Prepare permit applications to meet facility needs and agency requirements
- Submit permit application
- Prepare computer-based programs to simplify recordkeeping and to demonstrate compliance
- Consult with agencies to obtain required permits

For some permits, we also:

- Conduct necessary computer modeling
- Provide sampling and monitoring
- Assist in evaluating and selecting control devices

Water quality

We provide a wide variety of water quality services.

They include preparing and implementing:

- National Pollutant Discharge Elimination System (NPDES) permits
- Storm water permits and pollution prevention planning
- Wastewater treatment system permits
- Local sewer use requirement compliance
- Spill Prevention Control and Countermeasures (SPCC) planning

Air quality

MPE provides a full scope of permitting services for air emission sources including:

- All federal, state and local, construction and operating permits
- Prevention of Significant Deterioration (PSD) permits
- New Source Review (NSR) permits
- Title V permits
- Acid Rain permits
- Reporting and recordkeeping systems
- Odor evaluation and control
- Expert witness testimony
- Violation negotiation
- Technical support for:
 - NESHAPs (National Emissions Standards for Hazardous Air Pollutants)
 - RACT (Reasonably Available Control Technology)
 - BACT (Best Available Control Technology)
 - MACT (Maximum Available Control Technology)
- Professional Engineering services
