

## Mostardi Platt Environmental Environmental Compliance Management Services

### Innovative ways to accomplish your goals

Complex compliance measures can be a burden. At Mostardi Platt Environmental (MPE), we're enthusiastic about making it simpler for you. Our innovative approach puts your business first. We can help you achieve your goals more efficiently and cost-effectively.

From economic impact analysis to safety plan development, MPE can do virtually anything that an in-house team would do. Our services are customized for each client, depending on the level of outsourcing needs. Regardless of project size or scope, you can rely on MPE to help accomplish your goals.

### Your outsourcing partner

Our services include:

- Compliance management activities for air, water and waste
- Compliance Management Program (CMP®)
- Audits and facility inspections
- Environmental outsourcing
- Economic analysis of control strategies
- Air dispersion modeling
- Permitting:
  - Title V
  - NSR
  - PSD
  - NSPS
- Risk Management Plans
- Spill Prevention, Control and Countermeasures (SPCC)
- System installation and maintenance
- Wastewater sampling and analysis
- Indoor air quality monitoring
- Litigation support
- Violation negotiation
- Regulatory research
- Compliance reporting
- Noise impact studies and modeling

## Compliance Management Program (CMP®)

Determine applicable regulations, track compliance and prove that issues have been addressed with our exclusive four-part environmental Compliance Management Program (CMP®). CMP combines personal service with a software system for compliance management.

The CMP Advantage:

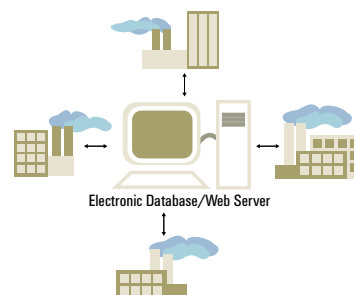

- Customized to provide the exact service you need
- The perfect tool for facility outsourcing
- Cost-effective facility compliance without full-time employees serving as a virtual environmental compliance division
- Provides access to our exclusive expertise and experience

System tools include:

- Scheduling of actions and tasks
- Spreadsheets and graphics
- Digital storage of reports, records and correspondence

CMP includes four levels of service:

- Audit of environmental compliance
- Computer-based management plan
- Ongoing support and maintenance
- Annual review

### A complete system for compliance management

#### 1. Environmental Compliance Audit

This comprehensive audit evaluates all areas affected by environmental regulations: facility operations, plant equipment, raw material storage and usage, waste handling activities, permits, reports, and recordkeeping. The audit can be completed with legal counsel representation to extend attorney client privileges to the client company.

#### 2. Environmental Compliance Management Plan

This computer-based system tracks compliance tasks, deadlines, recordkeeping and reporting requirements, and identifies the party responsible for completing these items. A facility inspection schedule ensures facility compliance as operations and regulations change.

#### 3. Ongoing Technical Support and Maintenance

MPE provides support for all tasks identified in the CMP, regardless of whether they are completed by our staff members or by facility personnel. We can fully manage the system or provide assistance as needed.

#### 4. Annual Review

Each year, an MPE project manager will complete a facility compliance review. This annual review identifies any operational or regulatory changes, and provides the client with an updated compliance calendar for the following year.
