

## Mostardi Platt Environmental Environmental Site Assessment Services

### Innovative and reliable ways to assess risk and avoid liabilities

Cost savings — that's just one aspect of effective environmental assessments. Mostardi Platt Environmental (MPE) can help your company assess environmental risk and avoid potentially severe financial and legal liabilities associated with environmental exposure.

### Experience that works for you

Mostardi Platt Environmental has offered top quality environmental assessment services since CERCLA (Comprehensive Environmental Response, Compensation and Liability Act) was promulgated in 1983. Over the years, we've worked with thousands of companies in diverse fields, from commercial and banking to utility and industrial. You can rely on our extensive experience and training to deliver thorough, cost-effective services. Our phased approach is designed to completely meet your assessment needs. Regardless of project size or scope, you can rely on MPE to help accomplish your goals.

- Asbestos and lead sampling and analysis
- Indoor air quality review, evaluation, sampling and analysis
- Health and safety review and evaluations
- Obtaining and reviewing information pursuant to the Freedom of Information Act (FOIA)
- Regulatory compliance review and evaluation

# Innovative Environmental Site Assessment

## Phase I Environmental Site Assessment

Our Phase I Environmental Site Assessment conforms with the current standards and practices outlined in the American Society for Testing and Materials (ASTM) E 1527-00 standard.

It typically includes:

- Examination of government records
- Review of government environmental databases
- Review of historical documents
- Reconnaissance of the subject property and adjoining properties
- On-site interviews

## Phase II Site Assessment

The site-specific Phase II assessments meet your needs with sensitivity to legal issues. We work closely with you to establish clear objectives.

This may include:

- Soil and groundwater investigations to cost-effectively characterize potential or known environmental impacts
- Suspected asbestos-containing building material investigation
- Electromagnetic investigation
- PCB inspection

## Computer Modeling Services

MPE professionals provide the quality computer modeling services you need.

They include:

- Contaminant, fate and transport
- Wellhead capture zone delineation
- Groundwater flow
- Risk Assessment modeling

## Remediation Services

When remediation is necessary, MPE can help. We identify the most appropriate, innovative technology available, and design and coordinate remediation activities between the appropriate regulatory agencies, remediation contractors and you. MPE can use the information obtained during our assessment to negotiate closure of regulated or voluntary projects with the regulating agencies.

## Wetland Services

When wetlands pose an issue, our professionals are at your services. We offer a full range of services.

They include:

- Wetland assessment, delineation and permitting
- Threatened or endangered species investigations
- Historic archeological and cultural resources review
