

## Mostardi Platt Environmental OSHA Compliance Services

### Innovative ways to protect yourself and your employees

Complying with complex OSHA measures can be a burden. At Mostardi Platt Environmental (MPE), we're enthusiastic about making it simpler for you. Our innovative approach puts your business first. We can help you achieve performance objectives.

MPE can help your in-house team more effectively address occupational health and safety issues. Our customized services range from outsourced testing and auditing to full system development and support. Regardless of your OSHA needs, you can rely on MPE to accomplish your goals.

### Your outsourcing partner

Our OSHA services include:

- Compliance Management Program (CMP®) system development and implementation
- Occupational safety and health outsourcing
- Lockout/tagout program development
- Audits
- Facility inspections
- Testing for mold and bacteria
- Indoor air quality assessment
- Regulatory research
- Representation at regulatory meetings

MPE also provides development and/or training services for:

- Hazard communication programs
- Emergency action plans
- Hearing conservation programs
- Industrial-powered truck operators

## Compliance Management Program (CMP®)

Get the exact compliance service you need with our exclusive OSHA Compliance Management Program. It's a full-spectrum approach that can help determine applicable regulations, track compliance, and prove that issues have been addressed.

The CMP Advantage:

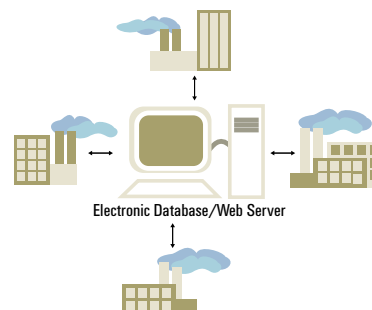

- A software system for compliance management
- Customized to provide the exact service you need
- Simplifies the compliance process
- Supplies useful reports and multimedia tools
- Provides personal service and direct access to MPE experts

System tools include:

- Scheduling of actions and tasks
- Spreadsheets and graphics
- Digital storage of reports, records, and correspondence
- Digital storage of crucial health and safety records

CMP includes three levels of service:

- Occupational safety and health audits
- System development and implementation
- Ongoing support, research and regulatory updating

### A complete system for OSHA compliance management

#### 1. Audit of occupational safety and health

This comprehensive audit evaluates all areas affected by safety and health regulations, including facility operations, plant equipment, raw material storage/usage, substance management, employee training, material handling activities, and occupational safety and health records. The audit can be completed with legal counsel representation to extend attorney client privileges to the company.

#### 2. System development and implementation

We customize the CMP software system to meet your specific occupational safety and health management needs. This comprehensive system can process audit data and/or information from other sources. It tracks compliance dates, regulatory requirements, obligations for reporting and recordkeeping, employee training, and facility inspection schedules, and includes a detailed requirements summary. A compliance calendar makes it simple to identify upcoming action items and deadlines.

#### 3. Ongoing support, and regulatory updating

You can count on MPE to provide ongoing technical support and guidance. Our proactive approach helps you stay on top of changing applicable regulations, address issues surrounding employee safety and health, and preserve regulatory compliance.

How can we help you? Call Mostardi Platt Environmental today.
